

Exam information sheet

15.10 Contractor – Refrigeration

Introduction

This document includes information on the objectives of the examination, a summary of its content, and the legislation and standards to be studied.

Examination objectives and presentation

Successful candidates may act as guarantors for construction work included in the following subclass:

15.10 - Contractor – Refrigeration

This subclass authorizes construction work that is not reserved exclusively for master pipe-mechanics relating to any refrigeration system, including work related to air conditioning, industrial processes and food preservation.

It also authorizes construction work relating to the heating and air conditioning devices of a pulsed air system provided that the contractor also holds the appropriate subclass 15.1, 15.1.1, 15.7 or 15.8.

In addition, this subclass authorizes construction work relating to the heating and air conditioning devices of a hydronic system provided that the contractor also holds the appropriate subclass 15.4 or 15.4.1.

Lastly, it authorizes similar or related construction work.

Exam information

- Duration: 3 hours
- Passing grade: 60%
- Language: French or English
- Type of exam: multiple-choice questions

Examination content

The examination for subclass *15.10 - Contractor – Refrigeration* covers the following subjects:

- Definitions and types of systems;
- Legislative, normative and regulatory framework;
- Reading plans and specifications;
- Standards and management of work.

Exam preparation

To prepare for the exam, it is advisable to review the **competency profile**, which describes all the competencies and skills required of the guarantor that could be evaluated during the exam.

You will find the **competency profile**, this information sheet and other relevant information on our website: www.rbq.gouv.qc.ca/preparation-examen.
