

Introduction

This document includes information on the objectives of the examination, a summary of its content, and the legislation and standards to be studied.

Examination objectives and presentation

Successful candidates may act as guarantors for construction work included in the following subclass:

2.3. Contractor – Underground water pumping systems

This subclass authorizes construction work that is not the exclusive domain of master pipe mechanics and electrical contractors, and relates to groundwater pumping systems as well as similar or related construction work.

Exam information

- Duration: 3 hours
- Passing grade: 60%
- Language: French or English
- Type of exam: multiple-choice questions

Examination content

The examination for subclass 2.3 - *Contractor – Underground water pumping systems* covers the following subjects:

- Definitions and types of systems;
- Legislative, normative and regulatory framework;
- Reading and drawing specifications;
- Standards and execution of work.

Exam preparation

To prepare for the exam, it is advisable to review the **competency profile**, which describes all the competencies and skills required of the guarantor that could be evaluated during the exam.

You will find the **competency profile**, this information sheet and other relevant information on our website: www.rbq.gouv.qc.ca/preparation-examen.
