

Exam information sheet

3.1 Contractor – Concrete structures

Introduction

This document includes information on the objectives of the examination, a summary of its content, and the legislation and standards to be studied.

Examination objectives and presentation

Successful candidates may act as guarantors for construction work included in the following subclass:

3.1. Contractor – Concrete structures

This subclass authorizes construction work relating to cast or precast structural concrete.

It also authorizes construction work in subclass 3.2 of Schedule III.

Finally, it authorizes similar or related construction work.

Exam information

- Duration: 3 hours
- Passing grade: 60%
- Language: French or English
- Type of exam: multiple-choice questions

Examination content

The examination for subclass 3.1. *Contractor – Concrete structures* covers the following subjects:

- Reading and interpreting plans and specifications;
- Legislative, normative and regulatory framework;
- Definitions and types of structures;
- Standards and execution of work.

Exam preparation

To prepare for the exam, it is advisable to review the **competency profile**, which describes all the competencies and skills required of the guarantor that could be evaluated during the exam.

You will find the **competency profile**, this information sheet and other relevant information on our website: www.rbq.gouv.qc.ca/preparation-examen.
